SUMMARY

Backend-focused Computer Science undergraduate with internship experience in designing and developing RESTful APIs using Spring Boot and securing endpoints with JWT-based authentication. Experienced in relational databases and enterprise system maintenance. Passionate about building scalable and secure backend systems.

TECHNICAL SKILLS

Programming Languages	Java, PHP, C++
Backend Framework	Spring Boot, Laravel
Database	PostgreSQL, SQL Server

WORK EXPERIENCE

Fullstack Developer Intern at PT ESKALINK   August 2025 - February 2026

– Maintained and customized ERP modules using PHP (native) and Laravel based on client-specific business requirements

– Developed and modified database queries in SQL Server to support new features and data adjustments

– Implemented UI enhancements and resolved functional bugs to improve system usability and stability

– Collaborated with senior developers to analyze client change requests and translate them into technical solutions

Backend Developer Intern at PT Jaya Santoso Teknologi   January 2025 - July 2025

– Designed and developed RESTful APIs using Spring Boot with layered architecture and database integration to manage users, events, and guests

– Implemented Spring Security with JWT-based authentication and role-based authorization to secure API endpoints

– Collaborated with frontend developers to define API contracts and request/response schemas, reducing integration issues and improving development efficiency

EDUCATION

2022 - Present   Bachelor of Computer Science, **Multimedia Nusantara University** (GPA: 3.79/4.0)

CERTIFICATIONS AND COMPETITION EXPERIENCE

Finalist at Garuda Hacks 6.0 Hackathon in the Education & Equality track	July 2025
Complete A.I. & Machine Learning, Data Science Bootcamp – Udemy	August 2024
